SUSHANT CHAUHAN

Full-Stack MERN Developer • Game & 3D Environment Designer

Karnal, Haryana, India | +91-7015132358 | Gmail | linkedin | Portfolio

Full-Stack (MERN) Game & 3D Design Self-Driven Learner BCA – AI

PROFILE

Full-Stack MERN Developer with hands-on experience building web applications using React.js, Node.js, Express.js and MongoDB. Completed multiple structured training programs — including an intensive backend-focused MERN internship and an industrial training program — and independently builds and ships end-to-end personal projects on an ongoing basis. Brings a confident, self-driven approach backed by practical experience in game development, level design and 3D modeling, adding strong problem solving, visual hierarchy, performance awareness and attention to detail to every build.

EXPERIENCE

Self-Driven Developer — Independent Projects & Continuous Learning Ongoing

Independent Work

- Independently conceptualized, designed and built multiple end-to-end projects spanning full-stack web development and 3D environment art.
- Maintains a disciplined self-learning routine — regularly exploring new frameworks, engines and design patterns outside formal coursework.
- Applies modern development best practices (component-based architecture, version control, responsive design) across every personal build.
- Continuously iterates on past projects to refine performance, visual polish and code quality.

Web Development Intern — Backend & MERN Training Jul 2026 – Aug 2026

CodeQuotient School of Technology, Panipat

- Learned and applied the MERN stack with an emphasis on backend development, REST APIs, database operations and structured application architecture.
- Built a Student Management System using MongoDB, Express.js, React.js and Node.js as the internship project.
- Implemented CRUD workflows, database integration and a responsive management interface for handling student records.
- Practiced debugging, modular coding, Git-based workflow and translating requirements into working application features.

Industrial Trainee Jul 2025 – Aug 2025

CodeQuotient School of Technology

- Completed an intensive, project-driven 6–8 week training program focused on professional software development practices and career readiness.
- Strengthened real-world application architecture skills by translating abstract problem statements into working, structured code.
- Practiced collaborative development workflows, code reviews and iterative debugging in a fast-paced training environment.
- Demonstrated rapid learning agility, consistency and strong technical performance throughout the program, earning recognition from mentors.

SELECTED PROJECTS

Student Management System
MERN Stack • MongoDB • Express.js • React.js • Node.js

- Built as the internship project at CodeQuotient School of Technology, Panipat.
- Implemented CRUD operations, database integration and structured student-record workflows.
- Designed a responsive interface for managing and searching student information.

Library Management System
Web Development • Database

- Developed a management application for organizing books and library records.
- Focused on clear data handling, practical workflows and an easy-to-use interface.

Personal Portfolio Websites
React.js • JavaScript • Tailwind CSS

- Designed responsive portfolio websites to present development and creative work.
- Focused on clean navigation, visual hierarchy, responsive layouts and professional presentation.

Horror Game — Forest Level Design
Unreal Engine • Unity • Blender

- Designed a horror-themed forest level using environmental composition, pacing, sightlines and lighting.
- Created exploration spaces, set-pieces and atmosphere-focused environments to support gameplay flow.
- Applied level design thinking to guide player attention and communicate mood through the environment.

3D Modeling — Game Assets
Blender • Unity • Unreal Engine

- Modeled game assets and environment elements for use in 3D scenes.
- Worked with materials, textures, lighting and game-ready asset preparation.
- Balanced visual detail with practical real-time requirements when preparing assets for game environments.

TECHNICAL SKILLS

Frontend: React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, CRUD, MERN

Databases: MongoDB, SQL

Programming: C, C++, C#, Python, OOP, DSA

Game & 3D: Blender, Unity, Unreal Engine, Level Design, 3D Modeling, Environment Art, Lighting, Texturing

Tools: Git, GitHub

Productivity: MS Excel, MS PowerPoint, MS Word

Also familiar with: YouTube Creator Studio, Video Editing

CORE STRENGTHS

Problem Solving • Debugging & Troubleshooting • Systematic Thinking • Creativity & Design Thinking • Adaptability • Communication • Confidence • Leadership

EDUCATION

BCA — Artificial Intelligence July 2024 – July 2027
Kurukshetra University

Secondary Education — Non-Medical Science
War Heroes Memorial School, Basdhara, Karnal
Class 10 — **2022** Class 12 — **2024**

ACHIEVEMENTS

- HackWars Hackathon Runner-Up — NIT Karnataka
- CodeMaster Hackathon Runner-Up (Semifinalist) — CQST College
- WhiteHat Jr Game Developer Achievement — **2020**
- Football Medallist — Interschool Competition
- Basketball Medallist — Interschool Competition
